Citizenship: USA, Uruguay

CURRENT MANAGEMENT AND R&D ACTIVITIES

Manages the Magnetic Materials group of the Advanced Photon Source, a team of 12 Ph.D. beamline scientists, 2.5 scientific associates and 1 administrative secretary responsible for operations and R&D activities in 5 beamlines at sectors 4, 6 and 29 of APS. Responsibilities include safe and efficient operations of user programs, development of state-of-the-art user and R&D programs, staff career development, strategic planning and hiring, budget management and resource allocation.

Science lead for POLAR beamline, one of eight featured beamlines selected by the APS upgrade project (APS-U) to come online in 2023.

Develops polarized resonant x-ray scattering and absorption techniques and instrumentation for measurements of XAS/XMCD/XRMS under simultaneous extreme conditions of pressure, temperature and magnetic field to explore emergent quantum states of matter in correlated electron systems.

RESEARCH INTERESTS AND X-RAY TECHNIQUES

Electronic and magnetic materials; Interplay between structure and magnetism; Emergent quantum states at high pressures; Interfacial magnetism in heterostructures; Local atomic structure and disorder; Quantum phase transitions; Correlated electron systems; Magnetic frustration; Superconductivity.

X-ray Absorption Spectroscopy including Linear/Circular Dichroism variants (XAS, XLD, XMCD) and X-ray Absorption Fine Structure (XAFS); X-ray Resonant Scattering including Resonant Magnetic Scattering (XRMS), Resonant Magnetic Reflectivity (XRMR), and Magnetic Diffraction Anomalous Fine Structure (MDAFS). Imaging techniques to map magnetic domains in real and reciprocal space.

EMPLOYMENT/APPOINTMENTS

Senior Physicist	August 2020-Present
Fellow, Northwestern Argonne Institute of Science and Engineering (NAISE)	Jan 2019-Present
Adjunct Professor of Physics, Washington University in St. Louis	Feb 2015-Present
Group Leader, Magnetic Materials Group Argonne National Laboratory	Jan 2013-Present
Adjunct Associate Professor of Physics, Washington University in St. Louis	June 2010-Feb 2015
Physicist –Argonne National Laboratory	May 2005- Present

Assistant Physicist –Argonne National Laboratory	May 2001-May 2005
Post-doctoral Research Associate Argonne National Laboratory University of Washington	August 1999- May 2001 March 1998 - July 1999

EDUCATION

Ph.D. in Physics	University of Washington	1998
Thesis: <i>Local structural studies of oriented high temperature superconducting cuprates by polarized XAFS spectroscopy</i> (Advisor: Edward A. Stern)		
M.Sc. in Physics	Technion, Israel	1992
Thesis: <i>Effect of impurities on dynamical properties of dilute metallic binary alloys.</i> (Advisor: Hanan Shechter)		
B.Sc. in Physics	Technion, Israel	1989

LEADERSHIP IN MANAGEMENT AND MENTORING

Group Leader Magnetic Materials group (2013-Present): Manages a diverse team of 15 Ph.D. scientists, technical support and administrative staff in the operations and development of world class user facilities and R&D programs at 5 beamlines located at sectors 4, 6 and 29 of the Advanced Photon Source. Responsibilities include team building and inclusion, staff career development and mentoring, strategic planning and hiring for technical and scientific programs, resource and budget prioritization and allocation, work planning and control activities for safe operations, performance appraisals of 16 direct reports, preparing documentation and presentations for external reviews, fostering synergies with Argonne's programmatic divisions.

Mentors early career staff at national labs and academic institutions 2012-Present

Mentors Post-doctoral appointees (6) and Graduate students (5) 2001-Present

Former Post-doctoral appointees current appointments:

Dr. Shalinee Chikara – Staff scientist National High Magnetic Field Laboratory, Tallahassee

Dr. Mikhail Zhernenkov- Lead Beamline Scientist, SMI beamline, NSLS-II

Dr. Narcizo Souza-Neto- Group Leader, Brazilian Synchrotron Light Laboratory

Dr. Maria Angeles Laguna Marco- Staff Scientist, Universidad de Zaragoza, Spain

Dr. Carlos Escanhoela- Research Associate, Universidad Federal, Santo Andre, Brazil

Prof. Evgeny Kravtsov- Professor, Institute of Metal Physics, Russia

Former Graduate students current appointments:

Prof. Yuan-Chieh Tseng- Professor, National Chiao Tung University, Taiwan

Dr. Gilberto Fabbri, Beamline Scientist, Advanced Photon Source, ANL

Dr. Fei Sun, Laboratory manager, HPSTAR, China

Dr. Larissa Sayuri Ishibe Veiga, Research Associate, University College London (UCL)

Dr. Jose Renato Linares Mardegan, Beamline Scientist, P09, Petra III

LEADERSHIP IN RESEARCH AND DEVELOPMENT OF X-RAY TECHNIQUES

Science Lead, APS-U POLAR beamline (2015-Present): Led team of 15 scientists from U.S. academia and national labs in putting together the science case and related proposals for the new beamline POLAR as part of the APS-upgrade (APS-U) project. The new beamline will exploit the superb brilliance and coherence of the low-emittance APS-U source as well as tunable polarization from novel superconducting

insertion devices to probe electronic matter in quantum phases of condensed matter, particularly at extreme pressure conditions in the multi-Mbar range. Leads writeup of functional requirements and preliminary design documents. Coordinates and steers efforts of POLAR core team towards final design of beamline layout including optics, enclosures, and instrumentation for end stations. Represents POLAR team at external reviews by DOE and technical and scientific advisory panels.

X-ray absorption spectroscopy at high pressures (2007-Present): Developed a high-pressure (1 Mbar), low-temperature (1.3 K), in-field (6.5 Tesla) capability for XANES/XMCD/XAFS studies of magnetic materials at extreme conditions. The instrument features a diamond-anvil cell with perforated anvils to minimize anvil's absorption, remote control of piston-motion via compression and decompression gas membranes allowing *in-situ* pressure control at low temperatures, and an online Ruby fluorescence system for *in-situ* pressure calibration at low temperatures. This effort, seeded by LDRD funding, nucleated a successful R&D and user program leading to over 40 publications since inception [*Phys. Rev. Lett.* 124, 067201 (2020); *Phys. Rev. Lett.* 121, 037004 (2018); *Phys. Rev. Lett.* 114, 077202 (2015); *Phys. Rev. Lett.* 109, 027204 (2012); *Phys. Rev. Lett.* 109, 026403 (2012); *Phys. Rev. Lett.* 100, 045508 (2008); *Phys. Rev. Lett.* 102, 057206 (2009)].

X-ray studies of element- and site-specific magnetism in single crystals (2003-2008): Exploited the symmetry properties of crystals in combination with resonant scattering of circularly polarized (CP) x-rays to develop a new method to obtain crystal-site-selective magnetic information in single crystals. This technique allowed measuring site-selective magnetization reversals in permanent magnetic materials providing an atomic look at the origins of magneto-crystalline anisotropy in best permanent magnet Nd₂Fe₁₄B [*Phys. Rev. Lett.* 95, 217207 (2005); *Phys. Rev. B* 73, 144416 (2006); *Phys. Rev. B* 74, 104114 (2006); *Appl. Phys. Lett.* 93, 052504 (2008)]. Developed a digital lock-in detection system for dichroic diffraction of CP x-rays (U.S. Patent 7,403,592 issued July 2008).

X-ray studies of interfacial magnetism (1999-2014): Combined x-ray resonant reflectivity with magnetic circular dichroism techniques to develop x-ray resonant magnetic reflectivity as a tool to measure and quantify the spatial extent and strength of magnetic exchange coupling at buried interfaces of layered structures. These techniques revealed the existence of induced Gd magnetization near the Gd/Fe interface and determined its spatial extent. Generalized computer codes were developed to retrieve magnetization density profiles from layered structures within the first Born approximation, and to obtain anomalous magnetic scattering factors from XMCD measurements [*Phys. Rev. Lett.* 87, 207201 (2001); *Phys. Rev. B* 70, 134420 (2004); *Appl. Phys. Lett.* 91, 022503 (2007); *App. Phys. Lett.* 92, 162502 (2008) *Phys. Rev. B* 79, 134438 (2009), *Phys. Rev. B* 92, 224433 (2015)].

Polarized XAFS studies of local structure in high T_c superconductors (1992-1999): Exploited the polarization dependence of X-ray Absorption Fine Structure (XAFS) in anisotropic layered structures of high T_c superconductors to measure local atomic arrangements at structural phase transitions and around dopant atoms with unprecedented accuracy. Developed methods for preparation of magnetically aligned powders for polarization-dependent fluorescence XAFS experiments. Developed XAFS data analysis tools leveraging multiple scattering effects to probe three-body correlations (bonding angles). These measurements revealed, among others, the partial order-disorder nature of the Sr-induced phase transition in La_{2-x}Sr_xCuO₄ [*Phys. Rev. Lett.* 76, 439 (1996)], the polaronic nature of hole carriers doped by Sr in La_{2-x}Sr_xCuO₄ [*Phys. Rev. B (Rapid Communications)* 56, R521 (1997)], the high spin non Jahn-Teller state of Ni in La_{2-x}Sr_xCu_{1-y}Ni_yO₄ [*Phys. Rev. B* 64, 104510 (2001)] and the large local disorder in tilt angle of CuO₆ octahedra present in La_{1.875}Ba_{0.125}CuO₄ [*Phys. Rev. B* 61, 7055 (2000)].

RESEARCH NON X-RAY TECHNIQUES

Electron microscopy studies of local atomic structure of materials (1992-1995): Contributed to the development of the EXELFS technique (Extended Energy Loss Fine Structure) as a structural tool with high spatial resolution (50Å -1μm) in the Transmission Electron Microscope (TEM). Main contributions include improvements in data analysis and quantifying the effect of electron radiation damage as a limitation to high spatial resolution [*Micron* 30, 185-194 (1999), *Ultramicroscopy* 58 n.3-4 p.353 (1995)].

Mössbauer-effect studies of impurities in metals (1989-1992): Used Mössbauer spectroscopy on the ^{119}Sn isotope to study local dynamics and electronic properties of Sn impurities in Ag, Pb and Au metal hosts. Unusually large dynamics of Sn atoms was found at high temperatures, providing new clues into the role of point defects on lowering the melting temperature of dilute binary alloys [*Phys. Rev. B* **47**, 14032 (1993), *J. Phys. Cond. Matt.* **10**, 8573 (1998)].

COMPUTER EXPERTISE AND SOFTWARE DEVELOPMENTS

Experience in FORTRAN and C scientific programming. Experience with script language programming (PERL, C-shell) as well as UNIX and LINUX operating systems and a variety of software running on these platforms.

- Wrote a generalized code to retrieve magnetization density profiles in multilayers from fits of magnetic reflectivity data using the first Born approximation (1999-2001).
- Wrote a generalized Kramers-Krönig code to obtain accurate charge and magnetic anomalous scattering factors from XANES and XMCD measurements (2000-2001).
- Wrote a generalized code to simulate site-specific x-ray resonant dichroic diffraction of CP x-rays from crystals using ab-initio calculations of resonant scattering factors (2002-2004).
- Wrote a generalized code to calculate degree of circular polarization from Bragg-transmission phase retarding diamond crystals, PHARET (2000)
- Wrote a generalized code to correct X-ray Absorption Near Edge Structure (XANES) data for self absorption effects in fluorescence experiments, FLUO (1998).
- Contributed to UWXAFS package software development (1992-1998).

LANGUAGES

Fluent in English, Spanish and Hebrew.

AWARDS

2021 Outstanding Referee American Physical Society	2021
UChicago Argonne Board of Governors Distinguished Performance Award	2019
Fellow American Physical Society (Division of Condensed Matter Physics)	2015
Advanced Photon Source Users Organization Excellence in Beamline Science Award	2015
Argonne National Laboratory's Inventor Award	2009

FUNDING

Laboratory Directed Research and Development (LDRD) funding (\$1.012 M):

<i>A Novel Gas-Filled Microchannel Plate (GF-MCP)</i>	\$16K	2016
<i>X-ray Polarimetry Imager</i>	\$16K	2017
<i>Tuning electronic structure at high pressures: towards novel materials discovery from x-ray science under extreme conditions</i>	\$157 K \$260 K \$117 K	2012 2011 2010
<i>An Integrated x-ray and neutron approach to magnetic depth-profiling in nanostructures</i>	\$60 K \$110 K \$80 K	2008 2007 2006

<i>Site-specific magnetism in crystals</i>	\$96 K \$100 K	2005 2004
--	-------------------	--------------

PATENTS

Digital Lock-in detection of site-specific magnetism in magnetic materials No. 7,403,592 2008

SYNERGETIC ACTIVITIES AND COMMUNITY SERVICE

- Reviewer, Spring-8 Peer Review Panel Spectroscopy (S3) (Japan) Jul 2019-Jan 2021
- Member, Peer Review Panel 3, Diamond Light Source (UK) May 2020-present
- International Advisory Committee International Conference on Strongly Correlated Electron Systems (SCES 2020) October 2019
- Chair, Scientific Advisory Board REXS 2019 (New York, USA) June 2019
- International Advisory Committee, AIRAPT 27th (Rio de Janeiro, Brazil) August 2019
- Associate Editor, Quantum Materials section, *Functional Materials* May 2019-Present
- International Advisory and Program Committee, XAFS17 (Krakow, Poland) July 2018
- Co-chair, Microsymposium “XAS at extreme conditions”, 24th IUCr Congress, Hyderabad, India August 2017
- Guest Editor, *High Pressure Research* journal (“Frontiers of high pressure XAS”) August 2016
- Editorial Board Member, *Scientific Reports*, a *Nature* Journal April 2013-present
- International Scientific Advisory Committee, REXS 2016 (Hamburg, Germany) June 2016
- International Advisory and Program Committee, XAFS16 (Karlsruhe, Germany) August 2015
- Panelist, NSF-DMR Condensed Matter Physics- Magnetism 2015, 2016, 2019
- Member, Scientific Software Audit and Advisory Panel, Diamond Light Source, UK Oct 2012
- Secretary/Treasurer of the International x-ray absorption society (IXAS) July 2012- July 2018
- Workshop Organizer, "Spectroscopy of Rare-earth Materials at Extreme Conditions: Structure, Magnetism, and Energy", ANL May 2012
- Local Organizing Committee, International School and Symposium on Multifunctional Molecule-based materials, ANL March 2011
- Organizer, 1st North American Core Shell Spectroscopy Conference (NACSSC) August 2010
- Member, Photon Sciences Programmatic and Operations Committee on Hiring and Promotions (POC-HP) 2010-2017
- Organizer and Chair, Edward A. Stern Symposium at NACSSC August 2010
- Neutron and x-ray scattering ANL summer school instructor (XMCD) 2002-2015
- XAFS summer school instructor (“XAFS and other techniques”) 2005-2008
- Member General User Program spectroscopy panel APS/ANL (Chair 2007). 2006-2008
- Reviewer, Physics journals, DOE (SBIR, Early Career), SLAC proposals 1996-Present
- Organizer, Workshop on Novel Science with Polarized x-rays, ANL 2007
- Member, Advanced Photon Source Colloquium Committee 2004-2006

Gu, **D. Haskel**, P. Shafer, E. Arenholz, K. Haule, D. Vanderbilt, K. Rabe, J. Chakhalian, Proceedings of the National Academy of Sciences (PNAS) DOI/10.1073/pnas.1907043116 (2019).
15. *Coexistence of static and dynamic magnetism in the Kitaev spin liquid material Cu₂IrO₃*, E. Kenney, C. Segre, W. LAfargue-Dit-Hauret, O. Lebedev, M. Abramchuk, A. Berlie, S. Cottrell, G. Simutis, F. Bahrami, M. Mordinova, G. Fabbri, J. McChesney, **D. Haskel**, X. Rocquefelte, M. Graf, F. Tafti, Phys. Rev. B 100, 094418 (2019).

16. *Pressure-induced structural dimerization in the hyperhoneycomb iridate beta-Li₂IrO₃ at low temperatures*, L. Veiga, K. Glazyrin, G. Fabbri, C. Daswood, J. Vale, H. Park, M. Etter, T. Irifune, S. Pasarelli, D. McMorrow, T. Takayama, H. Takagi, **D. Haskel***, Phys. Rev. B 100, 064104 (2019).
17. *Evolution of structure and magnetism across the metal-insulator transition in the pyrochlore iridate (Nd_{1-x}Ca_x)₂Ir₂O₇*, Z. Porter, E. Zoglin, S. Britner, S. Husremovic, J. Ruff, Y. Choi, **D. Haskel**, G. Laurita, S. Wilson, Phys. Rev. B 100, 054409 (2019).
18. *Magnetism in iridate heterostructures leveraged by structural distortions*, D. Meyers, Y. Cao, G. Fabbri, N. Robinson, L. Hao, C. Fredrick, N. Traynor, J. Yang, J. Lin, M. Upton, D. Casa, J.-W. Kim, T. Gog, E. Karapetrova, Y. Choi, **D. Haskel**, P. Ryan, L. Horak, X. Liu, J. Liu, M. Dean, Scientific Reports 9, 4263 (2019).
19. *Evolution of electronic and magnetic properties of nominal magnetite nanoparticles at high pressure probed by x-ray absorption and emission techniques*, K. Werellapatha, C. Escanhoela, G. Fabbri, **D. Haskel**, A. Ankudinov, P. Chow, J. Phys.: Condens. Matter 31, 255301 (2019).
20. *Room-Temperature Ferromagnetic Insulating State in Cation-Ordered Double-Perovskite Sr₂FeReO₆ films*, C. Sohn, E. Skoropata, Y. Choi, X. Gao, A. Rastogi, A. Huon, M. McGuire, L. Nuchols, Y. Zhang, J. Freeland, **D. Haskel**, Ho Nyung Lee, Adv. Mater. 31, 1805389 (2019).

2018

21. *Decoupling carrier concentration and electron-phonon coupling in oxide heterostructures observed with inelastic x-ray scattering*, D. Meyers, K. Nakatsukasa, S. Mu, L. Hao, J. Yang, Y. Cao, G. Fabbri, H. Miao, J. Pelliciari, D. McNally, M. Dantz, E. Paris, E. Karapetrova, Y. Choi, **D. Haskel**, P. Shafer, E. Arenholz, T. Schmitt, T. Berlijn, S. Johnston, J. Liu, M. Dean, Phys. Rev. Lett. 121, 236802 (2018).
22. *Effect of Cr spacer on structural and magnetic properties of Fe/Gd multilayers*, A. Drovosekov, M. Ryabukhina, D. Kohlin, M. Kreines, E. Manuilovich, A. Savitsky, E. Kravtsov, V. Proglyado, V. Ustinov, T. Keller, Yu. Khaydukov, Y. Choi, **D. Haskel**, Journal of Experimental and Theoretical Physics 127, 742 (2018).
23. *Impact of Pressure on Magnetic order in Jarosite*, R. Klein, J. Walsh, S. Clarke, Y. Guo, W. Bi, G. Fabbri, Y. Meng, **D. Haskel**, E. Alp, R. van Duyne, S. Jacobsen, D. Freedman, J. Am. Chem. Soc. 140, 12001 (2018).
24. *Electronic and structural response to pressure in the hyperkagome-lattice Na₃Ir₃O₈*, F. Sun, H. Zheng, Y. Liu, E. Sandoval, C. Xu, J. Xu, C. Jin, C. Sun, W. Yang, H. K. Mao, J. itchell, A. Kolmogorov*, **D. Haskel***, Phys. Rev. B 98, 085131 (2018).
25. *Tuning magnetic coercivity with external pressure in iron-rhenium based ferrimagnetic double perovskites*, C. Escanhoela Jr., G. Fabbri, F. Sun, C. Park, J. Gopalakrishnan, K. Ramesha, E. Granado, N. Souza-Neto, M. van Veenendaal, **D. Haskel***, Phys. Rev. B 98, 054402 (2018)
26. *Pressure-Induced Superconductivity in Elemental Ytterbium Metal*, J. Song, G. Fabbri, W. Bi, D. Haskel, J. Schilling, Phys. Rev. Lett. 121, 037004 (2018)
27. *Giant magnetic response of a two-dimensional antiferromagnet*, Lin Hao, D. Meyers, H. Suwa, J. Yang, C. Frederick, T. Dasa, G. Fabbri, L. Horak, D. Kriegner, Y. Choi, J.-W. Kim, **D. Haskel**, P. Ryan, H. Xu, C. Batista, M. Dean, J. Liu, Nature Physics 14, 806 (2018)
28. *Local moment instability of Os in Honeycomb Li_{2.15}Os_{0.85}O₃*, M. Wallace, P. LaBarre, J. Liu, S. Pi, W. Pickett, D. Dessau, **D. Haskel**, A. Ramirez, M. Subramanian, Scientific Reports 8, 6605 (2018)
29. *Controlling entangled spin-orbit coupling of 5d states with interfacial heterostructure engineering*, J. W. Kim, Y. Choi, S. H. Chun, **D. Haskel**, D. Yi, R. Ramesh, J. Liu, P. J. Ryan, Physical Review B 97, 094426 (2018)
30. *Enhancement and destruction of spin-Peierls physics in a one-dimensional quantum magnet under pressure*, Costel Rotundu, J. Wen, W. He, Y. Choi, **D. Haskel**, Young Lee, Physical Review B 97, 054415 (2018)

2017

31. *Synthesis and electronic properties of Ruddlesden-Popper strontium iridate epitaxial thin films stabilized by control of growth kinetics*, X. Liu, Y. Cao, B. Pal, S. Middey, M. Kareev, Y.

- Choi, P. Shafer, **D. Haskel**, E. Arenholz, J. Chakhalian, Physical Review Materials 1, 075004 (2017)
32. *Unraveling 5f-6d hybridization in uranium compounds via spin-resolved L-edge spectroscopy* R.D. dos Reis, L.S.I. Veiga, C.A. Escanhoela Jr., J.C. Lang, Y. Joly, F. G. Gandra, **D. Haskel**, N.M. Souza-Neto, Nature Communications 8, 1203 (2017)
 33. *Pressure tuning of bond-directional exchange interactions and magnetic frustration in the hyperhoneycomb iridate beta-Li₂IrO₃*, L. Veiga, M. Etter, K. Glazyrin, F. Sun, C. Escanhoela, G. Fabbri, J. Mardegan, P. Mallavi, Y. Deng, P. Stavropoulos, H.Y. Kee, W. Yang, M. van Veenendaal, J. Schilling, T. Takayama, H. Takagi, **D. Haskel***, Physical Review B 96, 140402 (Rapid Communications) (2017)
 34. *Direct Measurement of the Magnetocaloric effect in La(Fe,Si,Co)13 compounds in pulsed magnetic fields* M. Ghorbani Zavareh, Y. Skourski, K. P. Skokov, D. Yu. Karpenkov, L. Zvyagina, A. Waske, **D. Haskel**, M. Zhernenkov, J. Wosnitza, O. Gutfleisch, Physical Review Applied 8, 014037 (2017)
 35. *Two-dimensional Jeff=1/2 antiferromagnetic insulator unraveled from Interlayer exchange coupling in artificial perovskite iridate superlattices*, L. Hao, D. MEyers, C. Frederick, G. Fabbri, J. Yang, N. Traynor, L. Horak, D. Kriegner, Y. Choi, J-W Kim, **D. Haskel**, P. Ryan, M. Dean, J. Liu, Physical Review Letters 119, 027204 (2017)
 36. *Resonant x-ray scattering reveals possible disappearance of magnetic order under hydrostatic pressure in the Kitaev candidate gamma-Li₂IrO₃*, N. P. Breznay, A. Ruiz, A. Frano, W. Bi, R. Birgeneau, **D. Haskel**, J. Analytis, Physical Review B 96, 020402(R)(2017) (Rapid Communications)
 37. *Reaction of amorphous/crystalline SiOC/Fe interfaces by thermal annealing*, Q. Su, M. Zhernenkov, H. Ding, L. Price, **D. Haskel**, E. Watkins, J. Majewski, L. Shao, M. Demkowicz Acta Materialia 135, 61-67 (2017)
 38. *Evidence for strong enhancement of the magnetic ordering temperature of trivalent Nd metal under extreme pressure*, J. Song, W. Bi, **D. Haskel**, J. S. Schilling, Physical Review B 95, 205138 (2017)
 39. *Hole doping and pressure effects on the II-II-IV-based diluted magnetic semiconductor (Ba_{1-x}K_x)(Zn_{1-y}Mn_y)₂As₂*, F. Sun, G. Q. Zhao, C. A. Escanhoela, Jr., B. J. Chen, R.H. Kou, Y. G. Wang, Y. M. Xiao, P. Chow, H. K. Mao, **D. Haskel***, W. G. Yang*, C. Q. Jin*, Physical Review B 95, 094412 (2017)
 40. *Charge partitioning and anomalous hole doping in Rh-doped Sr₂IrO₄*, S. Chikara, G. Fabbri, J. Terzic, G. Cao, D. Khomskii, **D. Haskel***, Physical Review B 95, 060407 (2017) (Rapid Communications, Editor Suggestion)

2016

41. *Slater insulator in Iridate perovskites with strong spin-orbit coupling*, Q. Cui, J. G. Cheng, W. Fan, A. E. Taylor, S. Calder, M. A. McGuire, J.Q Yan, D. Meyers, X. Li, Q. Cai, Y. Y. Jia, Y. Choi, **D. Haskel**, H. Gotou, Y. Uwatoko, J. Chakhalian, A. D. Christianson, S. Yunoki, J. B. Goodenough, J. S. Zhou, Phys. Rev. Lett. 117, 176603 (2016).
42. *Emerging magnetism and anomalous Hall effect in iridate-manganite heterostructures*, J. Nichols, X. Gao, S. Lee, T. Meyer, J. Freeland, V. Lauter, D. Yi, J. Liu, **D. Haskel**, J. Petrie, Er-Jia Guo, A. Herklotz, D. Lee, T. Ward, G. Eres, M. Fitzsimmons, H. N. Lee, Nature Comm. 7, 12721 (2016).
43. *Hard x-ray polarizer to enable simultaneous three-dimensional nanoscale imaging of magnetic structure and lattice strain*, J. Logan, R. Harder, L. Li, **D. Haskel**, P. Chen, R. Winarski, P. Fuesz, D. Schlagel, D. Vine, C. Benson, I. McNulty, J. Synch. Rad. 23, 1210 (2016).
44. *Combined single crystal polarized XAFS and XRD at high pressure: probing the interplay between lattice distortions and electronic order at multiple length scales in high Tc cuprates*, G. Fabbri, M. Hucker, G. Gu, J. Tranquada, **D. Haskel***, High Pressure Research 36, 348 (2016).
45. *Combining state of the are experiment and ab-initio calculations for a better understanding of the interplay between valence magnetism and structure in Eu compounds at high pressure*, N. Souza-Neto, **D. Haskel**, R. dos Reis, F. Gandra, High Pressure Research 36, 360 (2016).

46. *Magnetism in Ca₂CoOsO₆ and Ca₂NiOO₆: Unraveling the Mystery of superexchange interactions between 3d and 5d ions*, R. Morrow, K. Samanta, T. Saha Dasgupta, J. Xiong, J. Freeland, **D. Haskel**, P. Woodward, Chem. Mater. 28, 3666 (2016)
47. *Pressure effect on the magnetism of the diluted magnetic semiconductor (Ba_{1-x}K_x)(Zn_{1-y}Mn_y)₂As₂ with independent spin and charge doping*, F. Sun, N. N. Li, B. J. Chen, Y. T. Jia, J. J. Zhang, W. M. Li, G. Q. Zhao, L. Y. Xing, G. Fabbris, Y. G. Wang, Z. Deng, Y. J. Uemura, H. K. Mao, **D. Haskel***, W. G. Yang*, C. Q. Jin*, Phys. Rev. B 93, 224403 (2016)
48. *Magnetism of Eu under extreme pressures*, W. Bi, J. Lim, G. Fabbris, J. Zhao, **D. Haskel**, E. E. Alp, M. Y. Hu, P. Chow, Y. Xiao, W. Xu., J. S. Schilling, Phys. Rev. B 93, 184424 (2016).
49. *A transition from localized to strongly correlated electron behavior and mixed valence driven by physical or chemical pressure in ACo₂As₂ (A=Eu and Ca)*, X. Tan, G. Fabbris, **D. Haskel**, A. Yaroslavtsev, H. Cao, C. Thompson, K. Kovnir ,A. Menushenkov, R. Chernikov, V. Garlea, M. Shatruk, J. Am. Chem. Soc. 138, 2724 (2016).
50. *Understanding temperature and magnetic-field actuated magnetization polarity reversal in the Prussian blue analog Cu_{0.73}Mn_{0.77}[Fe(CN)₆].zH₂O using XMCD*, D. Lahiri, Y. Choi, S. Yusuf, A. Kumar, N. Ramanan, S. Chatoopadhyay, **D. Haskel**, S. Sharma, MAt. Res. Express 3, 036101 (2016).
51. *Magnetic Properties of GdT₂Zn₂₀ (T=Fe,Co) investigated by x-ray diffraction and spectroscopy*, J. Mardegan, S. Francoual, G. Fabbris, L. Veiga, J. Strempfer, **D. Haskel**, R. Ribeiro, M. Avila, V. Giles, Phys. Rev. B 93, 024421 (2016)

2015

52. *Tuning interfacial domain walls in GdCo/Gd/CdCo' spring magnets*, C. Blanco-Roldan, Y. Choi, C. Quiros, S. M. Validares, R. Zarate, M. Velez, J. M. Alameda, **D. Haskel**, J. I. Martin, Phys. Rev. B 92, 224433 (2015).
53. *Structural and chemical ordering of Heusler CoxMnyGez epitaxial films on Ge(111): Quantitative study using traditional and anomalous x-ray diffraction techniques*, B. A. Collins, Y. S. Chu, L. He, **D. Haskel** and F. Tsui, Phys. Rev. B 92, 224108 (2015).
54. *Decoupling of the antiferromagnetic and insulating states in Tb-doped Sr₂IrO₄*, J.C. Wang, S. Aswartham, Feng Ye, J. Terzic, H. Zheng, **D. Haskel**, S. Chikara, Y. Choi, P. Schlottman, R. C. Custelcean, S. J. Yuan, G. Cao, Phys. Rev. B 92, 214411 (2015).
55. *Spin-orbit driven magnetic insulating state with Jeff=1/2 character in a 4d oxide* S. Calder, L. Li, S. Okamoto, Y. Choi, R. Mukherjee, **D. Haskel**, D. Mandrus Phys. Rev. B 92, 180413 (R)(2015); Editor Suggestion
56. *Evolution of competing magnetic order in the Jeff=1/2 insulating state of Sr₂Ir_{1-x}R_xO₄* S. Calder, J. Kim, G. Cao, C. Cantoni, A. May, H. Cao, A. Aczel, M. Matsuda, Y. Choi, **D. Haskel**, B. Sales, D. Mandrus, M. Lumsden, A. Christianson Phys. Rev. B 92, 165128 (2015).
57. *Effect of chemical pressure on the magnetic ground states of the Osmate double perovskite Sr₂CaCo₃O₆ and Ca₂CoOsO₆*, R. Morrow, J. Yan, M. McCuire, J. Freeland, **D. Haskel**, P. Woodward, Phys. Rev. B 92, 094435 (2015)
58. *Sr₂Ir_{1-x}R_xO₄ (x<0.5): An inhomogeneous Jeff=1/2 Hubbard system*, S. Chikara, **D. Haskel**, J-H Sim, H-S Kim, C-C Chen, G. Fabbris, L. Veiga, N. Souza-Neto, J. Terzic G. Cao, M.J. Han, V. van Veenendaal, Phys. Rev. B (Rapid Communications) 92, 081114 (R) (2015).
59. *Electronic structure, local magnetism and spin-orbit effects of Ir(IV), IR(V) and Ir(VI) based compounds*, M. A. Laguna Marco, P. Kayser, J. Alonso, M. Martinez-Lope, M. van Veenendaal, Y. Choi, **D. Haskel**, Phys. Rev. B 91, 214433 (2015).
60. *Fragility of double exchange interactions and pressure tuning of magnetism in 3d-5d double perovskite Sr₂FeOsO₆*, L. Veiga, G. Fabbris, M. van Veenendaal, N. Souza Neto, H. Feng, K. Yamaura, **D. Haskel***, Phys. Rev. B 91, 235135 (2015).
61. *Itinerant ferromagnetism in the As 4p conduction band of Ba_{0.6}K_{0.4}Mn₂As₂ identified by x-ray magnetic circular dichroism*, B. Ueland, A. Pandey, Y. Lee, A. SApkota, Y. Choi, **D. Haskel**, R. Rosenberg, J. Lang B. Harmon, D. Johnston, A. Kreyssig, A. Goldman, Phys. Rev. Lett. 114, 217001 (2015).
62. *Depth resolved magnetic and structural analysis of relaxing epitaxial Sr₂CrReO₆*, J. Lucy, A. Hauser, Y. Liu, H. Zhou, Y. Choi, **D. Haskel**, S. te Velthuis, F. Yang, Phys. Rev. B 91, 094413 (2015).

63. *Anomalous pressure dependence of magnetic ordering temperature in Tb revealed by resistivity measurements to 141 GPa: Comparison with Gd and Dy*, J. Lim, G. Fabbris, **D. Haskel**, J. S. Schilling, Phys. Rev. B 91, 174428 (2015).
64. *Hyperhoneycomb Iridate beta-Li₂IrO₃ as a platform for Kitaev Magnetism*, T. Takayama, A. Kato, R. Dinnebier, J. Nuss, H. Kono, L. Veiga, G. Fabbris, **D. Haskel**, H. Takagi, Phys. Rev. Lett. 114, 077202 (2015).
65. *Electronic and structural ground state of heavy alkali metals at high pressure*, G. Fabbris, J. Lim, L. Veiga, **D. Haskel***, and J. Schilling*, Phys. Rev. B 91, 085111 (2015).
66. *Magnetic ordering at anomalously high temperatures in Dy at extreme pressures*, J. Lim, G. Fabbris, **D. Haskel** and J. S. Schilling, Phys. Rev. B 91, 045116 (2015).
67. *Ground-state wave function of plutonium in PuSb as determined via x-ray magnetic circular dichroism*, M. Janoschek, **D. Haskel**, J. Fernandez-Rodriguez, M. van Veenendaal, J. Rebizant, G. H. Lander, J. X. Zhu, J. D. Thompson, E. D. Bauer, Phys. Rev. B. 91, 035117 (2015).

2014

68. *Competition between heavy fermion and Kondo interaction in iso electronic A-site-ordered perovskites*, D. Meyers, S. Middey, J.G. Cheng, S. Mukherjee, B. A. Gray, Y. Cao, J.S. Zhou, J. B. Goodenough, Y. Choi, **D. Haskel**, J.W. Freeland, T. Saha-Dasgupta, J. Chakhalian, Nature Communications 5, 5818 (2014)
69. *Polar Cation Ordering: A Route to Introducing > 10% bond strain into layered oxide films*, B. Nelson-Cheeseman, H. Zhou, P. Balachandran, G. Fabbris, J. Hoffman, **D. Haskel**, J. Rondinelli, A. Bhattacharya, Advanced Functional Materials 24, 6884 (2014)
70. *Robust ferromagnetism in the compressed permanent magnet Sm₂Co₁₇*, J. Jeffries, L. Veiga, G. Fabbris, **D. Haskel**, P. Huang, N. Butch, S. McCall, K. Holliday, Z. Jenei, Y. Xiao, P. Chow, Phys. Rev. B 90, 104408 (2014)
71. *Proximity effects on dimensionality and magnetic ordering in Pd/Fe/Pd trilayers*, T. Hase, M. Brewer, U. Arnalds, M. Ahlberg, V. KApaklis, M. Bjorck, L. Bouchenoire, P. Thompson, **D. Haskel**, Y. Choi, J. Lang, C. Sanchez-Hanke, B. Hjorvarsson, Phys. Rev. B, 90, 104403 (2014)
72. *Different response of transport and magnetic properties of BaIrO₃ to chemical and physical pressure*, M. A. Laguna-Marcos*, G. Fabbris, N. Souza-Neto, S. Chikara, J. S. Schilling, G. Cao, **D. Haskel***, Phys. Rev. B 90, 014419 (2014).
73. *Origin of the volume collapse under pressure in elemental Dy*, J. Lim, G. Fabbris, D. Haskel and J.S. Schilling, Journal of Physics: Conference Series 500, 192009 (2014).
74. *Magnetic structure in epitaxially strained Sr₂CrReO₆ thin films by element-specific XAS and XMCD*, A. Hauser, J. Lucy, M. Gaultois, M. Ball, J. Soliz, Y. Choi, O. Restrepo, W. Windl, J. Freeland, **D. Haskel**, P. Woodward, F. Yang, Phys. Rev. B 89, 180402 (2014).

2013

75. *Different routes to pressure-induced volume collapse transitions in gadolinium and terbium metals*, G. Fabbris, T. Matsuoka, J. Lim, J. R. L. Mardegan, K. Shimizu, **D. Haskel**, J. S. Schilling, Phys. Rev. B. 88, 245103 (2013).
76. *Pressure induced amorphization and collapse of magnetic order in the type-I clathrate Eu₈Ga₁Ge₃₀*, J. Mardegan, G. Fabbris, L. Veiga, C. Adriano, M. Avila, **D. Haskel**, C. Giles, Phys. Rev. B 88, 144105 (2013).
77. *Modification of magnetic anisotropy through 3d-4f coupling in La_{0.75}Pr_{0.25}Co₂P₂*, K. Kovnir, C. Thompson, V. Garlea, **D. Haskel**, A. Polyanskii, H. Zhou, M. Shatruk, Phys. Rev. B 88, 104429 (2013).
78. *Electronic contribution to the enhancement of the magnetic ordering temperature by Si substitution in Gd₅(SixGe_{1-x})₄*, Y.C. Tseng, D. Paudyal, Ya. Mudryk, V. Pecharsky, K. Gschneidner, **D. Haskel**, Phys. Rev. B 88, 054428 (2013).
79. *Local structure, stripe pinning and superconductivity at high pressure in La_{1.875}Ba_{0.125}CuO₄*, G. Fabbris, M. Hücker, G. Gu, J. Tranquada, **D. Haskel***, Phys. Rev. B (Rapid Communications) 88, 060507 (2013).
80. *Pressure-induced volume collapse and structural phase transitions in SrRuO₃*, M. Zhernenkov, G. Fabbris, O. Chmaisssem, J. Mitchell, H. Zheng, **D. Haskel**, Journal of Solid State Chemistry 205, 177-182 (2013).

2012

81. *Pressure-induced tuning of a magnetic phase separation in Nd_{0.53}Sr_{0.47}MnO₃*
M. Baldini, Y. Ding, S. Wang, Y. Lin, C. A. Tulk, A. M. dos Santos, J. F. Mitchell, **D. Haskel**, and W. L. Mao, Phys. Rev. B 86, 094407 (2012)
82. *Charge-magnetic interference resonant scattering studies of ferromagnetic crystals and thin films* (Invited Review), **D. Haskel***, E. Kravtsov, Y. Choi, J.C. Lang, Z. Islam, G. Srager, J.S. Jiang, S.D. Bader, and P.C. Canfield, Eur. Phys. J. Special Topics 208, 141-155 (2012)
83. *Reentrant Valence Transition in EuO at High Pressures: Beyond the Bond-Valence Model*
N. M. Souza-Neto*, J. Zhao, E. E. Alp, G. Shen, S.V. Sinogeikin, G. Lapertot, and **D. Haskel***
Phys. Rev. Lett. 109, 026403 (2012)
84. *Pressure Tuning of the Spin-Orbit Coupled Ground State in Sr₂IrO₄*, **D. Haskel***, G. Fabbris, Mikhail Zhernenkov, P. P. Kong, C. Q. Jin, G. Cao, and M. van Veenendaal , Phys. Rev. Lett 109, 027204 (2012)
85. *High-pressure tuning of valence and magnetic interactions in Eu_{0.5}Yb_{0.5}Ga₄* , G. D. Loula, R. D. dos Reis, **D. Haskel**, F. Garcia, N. M. Souza-Neto, and F. C. G. Gandra , Phys. Rev. B 85, 245128 (2012)
86. *Synchrotron x-ray spectroscopy studies of valence and magnetic state in europium metal to extreme pressures*, W. Bi, N.M. Souza-Neto, **D. Haskel**, G. Fabbris, E. E. Alp, J. Zhao, R.G. Hennig, M.M. Abd-Elmeguid, Y. Meng ,R. W. McCallum, K. Dennis, J. S. Schilling, Phys. Rev. B 85, 205134 (2012)
87. *Influence of the Fe content on the Gd magnetic ordering temperature in Ni_xFe_{1-x}/Gd multilayers*
R. Ranchal, Y. Choi, M. Romera, J. W. Freeland, J. L. Prieto, and **D. Haskel** Phys. Rev. B 85, 024403 (2012)
88. *Interfacial magnetic coupling between Fe nanoparticles in Fe-AG granular alloys*
J. Alonso, M. L. Fdez-Gubieda,G. Sarmiento, J. Chaboy, R. Boada, A. Garcia Prieto, **D. Haskel**, M. A. Laguna Marco,J. Lang. C. G. Meneghini,L. Fernandez Barquin, T. Neisius, I Orue, Nanotechnology 23, 02570 (2012)

2011

89. *Stability of the ferromagnetic ground state of La₂MnNiO₆ against large compressive stress*
D. Haskel*, G. Fabbris, N. M. Souza-Neto, M. van Veenendaal, G. Shen, A. E. Smith, M. A. Subramanian Phys. Rev. B. (Rapid Communications) 84, 100403(R) (2011)
90. *Effect of Si doping and applied pressure upon magnetostructural properties of Tb₅(SixGe_{1-x})₄ magnetocaloric compounds* Y.C. Tseng, H-J Ma, C-Y Yang, Y. Mudryk, V. Pecharsky, K. Gschneidner, N. Souza-Neto, **D. Haskel**, Phys. Rev. B. 83, 104419 (2011)

2010

91. *Application of Polarized Neutron Reflectometry and X-ray resonant magnetic reflectometry for determining the inhomogeneous magnetic structure in Fe/Gd multilayers*
Evgeny Kravtsov, **Daniel Haskel**, S. G. E. te Velthuis, J. S. Jiang, B. J. Kirby
Bulletin of the Russian Academy of Sciences: Physics, Vol. 74, pp.1471-1473 (2010)
92. *Orbital magnetism and spin-orbit effects in the electronic structure of BaIrO₃* Ma. Angeles Laguna-Marco*, **Daniel Haskel***, Narcizo Souza-Neto, Jonathan Lang, Vemuru Krishnamurthy, Sharine Chikara, Gang Cao, Michel van Veenendaal*, Phys. Rev. Lett. 105, 216407 (2010)

2009

93. *Temperature dependence of Eu 4f and Eu 5d magnetizations in the filled skutterudite EuFe₄Sb₁₂*, V.V. Krishnamurthy, D. Keavney, **D. Haskel**, J. Lang, G. Srager, B. Sales, D. Mandrus, J. Robertson Physical Review B 79, 014426 (2009).
94. *Pressure induced electronic mixing and enhancement of magnetic ordering in EuX (X=O,S,Se,Te) magnetic semiconductors* Narcizo M. Souza-Neto*, **D. Haskel***, Yuan-Chieh Tseng and Gerard Lapertot Physical Review Letters 102, 057206 (2009).
95. *Non zero orbital moment in high coercivity epsilon-Fe₂O₃ and low-temperature collapse of the magnetocrystalline anisotropy* Y. C. Tseng, Narcizo M. Souza-Neto, **D. Haskel***,M.

- Gich*, C. Frontera, A. Roig*, M. van Veenendaal and J. Nogues *Physical Review B* 79, 094404 (2009)
96. *Complementary polarized neutron and resonant x-ray magnetic reflectometry measurements in Fe/Gd heterostructures: Case of inhomogeneous intralayer magnetic structure* E. Kravtsov, **D. Haskel**, S.G.E te Velthuis, J. S. Jiang, B. J. Kirby *Physical Review B* 79, 134438 (2009)
 97. *Evidence for ligand-induced paramagnetism in CdSe quantum dots* Robert W. Meulenberg, Jonathan R. I. Lee, Scott K. McCall, Khalid M. Hanif, **Daniel Haskel**, Jonathan C. Lang, Louis J. Terminello, and Tony van Buuren *J. Am. Chem. Soc.* 131, 6888-6889 (2009)
 98. *Pressure induced magnetic transition in Manganite (La_{0.75}Ca_{0.25}MnO₃)* Y. Ding, **D. Haskel**, Y.C. Tseng, E. Kaneshita, M. van Veenendaal, J. Mitchell, S. Sinogeikin, V. Prakapenka, H.-k. Mao *Physical Review Letters* 102, 237201 (2009)
 99. *Enhancement of induced Vanadium polarization due to rough interfaces in polycrystalline Fe/V/Fe trilayers* C. Clavero, J. Skuza, Y. Choi, **D. Haskel**, C. Sanchez-Hanke, R. Loloee, M. Zhernenkov, M. Fitzsimmons, R. Lukaszew *Physical Review B* 80, 024418 (2009)
 100. *Stress induced large Curie temperature enhancement in Fe₆₄Ni₃₆ Invar Alloy* . Gorria, D. Martinez-Blanco, M. J. Perez, J. Blanco, A. Hernando, M. A. Laguna Marco, **D. Haskel**, N. Souza-Neto, R. Smith, W. Marshall, G. Garbarino, M. Mezouar, A. Fernandez-Martinez, J. Chaboy, L. Fernandez Barquin, J. A. Rodriguez Castrillon, M. Moldovan, J. I. Garcia Alonso, J. Zhang, A. Llobet, J. S. Jiang *Physical Review B* 80, 064421 (2009)
 101. *X-ray magnetic circular dichroism and small angle neutron scattering study of Thiol capped Gold nanoparticles* J. de la Venta, V. Bouzas, A. Pucci, M. A. Laguna-Marco, **D. Haskel**, S. G. E. te Velthuis, A. Hoffmann, J. Lal, M. Bleuel, G. Ruggeri, C. de Julian Fernandez, and M. A. Garcia *Journal of Nanoscience and Nanotechnology* Vol.9, 6434-6438 (2009)
 102. *Element specific probe of Ru magnetism and local structure in RuSr₂Eu_{1.5}Ce_{1.5}Cu₂O₁₀* N. Souza-Neto, **D. Haskel***, J. Lang, O. Chmaissem, B. Dabrowski, I. Felner *Phys. Rev. B* 80, 140414(R) (2009)

2008

103. *Element- and site-specific oxidation state and cation distribution in manganese ferrite films by diffraction anomalous fine structure*, A. Yang, Z. Chen, A. L. Geller, X. Zuo, **D. Haskel**, E. Kravtsov, C. Vittoria and V. G. Harris, *Applied Physics Letters* 93, 052504 (2008).
104. *Magnetic Spectroscopy at High Pressure using x-ray magnetic circular dichroism* **D. Haskel***, Y.C. Tseng, N.M. Souza Neto, J.C. Lang, S. Sinogeikin, Ya. Mudryk, K. A. Gschneidner Jr. and V. Pecharsky *High Pressure Research* 28, 185 (2008).
105. *Competing interactions and complex magnetism at SrRuO₃/SrMnO₃ interfaces* Y. Choi, Y.C. Tseng, **D. Haskel**, D.E. Brown, D. Danaher and O. Chmaissem *Applied Physics Letters* 93, 192 (2008).
106. *Pressure induced removal of magnetostructural inhomogeneity in Ge-rich Gd₅(SixGe_{1-x})₄ giant magnetocaloric materials* Y. C Tseng, **D. Haskel***, N. M. Souza-Neto, Ya. Mudryk, V. K. Pecharsky, and K. A. Gschneidner, Jr. *Physical Review B* 78, 214433 (2008).
107. *The nature of Ho magnetism in Multiferroic HoMnO₃*, S. Nandi, A. Kreyssig, L. Tan, J. W. Kim, J.Q. Yan, J. C. Lang, **D. Haskel**, R. J. McQueeney, and A. I. Goldman, *Physical Review Letters* 100, 217201 (2008).
108. *Control of the perpendicular magnetic anisotropy of FePd films via Pd cap deposition*, C. Clavero, J. R. Skuza, Y. Choi, **D. Haskel**, J. M. Garcia-Martin, A. Cebollada and R. A. Lukaszew *Applied Physics Letters* 92, 162502 (2008).
109. *Novel Pressure-Induced Magnetic Transition in Magnetite (Fe₃O₄)*, Y. Ding, **D. Haskel**, S. G. Ovchinnikov, Y.C. Tseng, Y. S. Orlov, J. C. Lang and Ho-kwang Mao, *Physical Review Letters* 100, 045508 (2008).
110. *Pressure tuning of the magnetic transition in Gd₅(Si_{0.375}Ge_{0.625})₄ giant magnetocaloric effect material*, Y. C. Tseng, **D. Haskel**, J. C. Lang, Ya. Mudryk, V. K. Pecharsky and K. A. Gschneidner, *Journal of Applied Physics* 103, 07B301 (2008).
111. *Net Mn moment due to canted spins are SrRuO₃/SrMnO₃ interfaces*, Y. Choi, Y. Z. Yoo, O. Chmaissem, A. Ullah, S. Kolesnik, C. W. Kimball, **D. Haskel**, J. S. Jiang and S. D. Bader, *Journal of Applied Physics* 103, 07B517 (2008).

2007

112. *Instrument for x-ray magnetic circular dichroism measurements at high pressures*, **D. Haskel***, Y. C. Tseng, J. C. Lang, S. Sinogeikin, *Review of Scientific Instruments* **78**, 083904 (2007).
113. *Effect of hydrostatic pressure upon the magnetic transitions in the Gd₅(SixGe_{1-x})₄ giant magnetocaloric compounds: X-ray magnetic circular dichroism study*, Y. C. Tseng, **D. Haskel**, J. Lang, S. Sinogeikin, Y. Mudryk, V. K. Pecharsky and K. A. Gschneidner, *Physical Review B* **76**, 014411 (2007).
114. *Ferromagnetic Mn moments at SrRuO₃/SrMnO₃ interfaces*, Y. Choi, Y. Z. Yoo, O. Chmaissem, A. Ullah, S. Kolesnik, C. W. Kimball, **D. Haskel**, J. S. Jiang, S. D. Bader, *Applied Physics Letters* **91**, 022503 (2007).
115. *Role of Ge in Bridging Ferromagnetism in the Giant Magnetocaloric Gd₅[Ge(1-x)Si(x)]₄ Alloys* **D. Haskel***, Y. B. Lee, B. N. Harmon, Z. Islam, J. C. Lang, G. Srager, Ya. Mudryk, K. A. Gschneidner, V. K. Pecharsky, *Phys. Rev. Lett.* **98**, 247205 (2007).
116. *Ferrimagnetism in EuFe₄Sb₁₂ due to the Interplay of f-electron moments and a nearly ferromagnetic host*, V. Krishnamurthy, J. Lang, **D. Haskel**, D. Keavney, G. Srager, J. Robertson, B. Sales, D. Mandrus, D. Singh, D. Bilc, *Phys. Rev. Lett.* **98**, 126403 (2007).
117. *Electronic structure and magnetism in compressed 3d transition metals*, V. Iota, J-H Park, C-S Yoo, J. Lang, **D. Haskel** and G. Srager, *Appl. Phys. Lett.* **90**, 042505 (2007)

2006

118. *Haskel and van Veenendaal Reply*, **D. Haskel*** and M. van Veenendaal*, *Phys. Rev. Lett.* **97**, 259702 (2006).
119. *Site-specific local structure of Mn in artificial manganese ferrite films*, E. Kravtsov, **D. Haskel**, A. Cady, A. YAng, C. Vittoria, X. Zuo and V. G. Harris, *Phys. Rev. B* **74**, 104114 (2006).
120. *Observation of x-ray magnetic circular dichroism at the Ru K-edge of Co-Ru alloys*, H. Hashizume, K. Ishiji, J. Lang, **D. Haskel**, G. Srager, J. Minar, H. Ebert, *Phys. Rev. B* **73**, 224416 (2006).
121. *Twisted magnetization states near the compensation temperature of Fe/Gd multilayers: Anisotropy and surface-termination effects*, Y. Choi, **D. Haskel**, A. Cady, J. Lang, D. R. Lee, G. Srager, J.S. Jiang and S. D. Bader, *Phys. Rev. B* **73**, 174401 (2006).
122. *An X-ray study of non-zero nickel moment in a ferromagnetic shape-memory alloy*, Z. Islam, **D. Haskel**, J. Lang, G. Srager, Y. Lee, B. N. Harmon, A. I. Goldman, D. L. Schlagel, T. A. Lograsso, *J. Magn. Magn. Mat.* **303**, 20 (2006).
123. *Site-specific magnetization reversal studies of magnetite*, A. Cady, **D. Haskel**, J. Lang, Z. Islam, G. Srager, A. Ankudinov, G. Subias, J. Garcia, *Phys. Rev. B* **73**, 144416 (2006).

2005

124. *Atomic Origin of Magnetocrystalline anisotropy in Nd₂Fe₁₄B*, **D. Haskel***, J. Lang, Z. Islam, A. Cady, G. Srager, M. van Veenendaal, P. Canfield, *Phys. Rev. Lett.* **95**, 217207 (2005).
125. *Hard x-ray resonant techniques for studies of nanomagnetism*, G. Srager, J. C. Lang and **D. Haskel**, in *Modern Techniques for Characterizing Magnetic Materials* (Y. Zhu, Editor), Kluwer academic publishers, Chapter 5, pp. 201-227 (2005).
126. *A new approach for improving exchange-spring magnets*, J.S. Jiang, J. E. Pearson, Z. Y. Li, B. Kabius, S. Trasobares, D. J. Miller, S. D. Bader, D. R. Lee, **D. Haskel**, G. Srager, J. P. Liu, *J. Appl. Phys.* **97**, 10K311 (2005).
127. *High-resolution polarization analysis study of long-range magnetic order in cuprates*, Z. Islam, **D. Haskel**, J. Lang, G. Srager, X. Liu, S. K. Sinha, B. W. Veal, *Phys. Rev. B* **71**, 212506 (2005).
128. *Scanning low-temperature element-specific magnetic microscopy*, A. Cady, **D. Haskel**, J. Lang, G. Srager, P. Chupas, R. Osborn, J. F. Mitchel, J. S. Ahn, N. Hur, S. Park, *Review of Scientific Instruments* **76**, 063702 (2005).

2004

129. *Improving exchange-spring nanocomposite permanent magnets* J.S. Jiang, J.E. Pearson, Z.Y. Liu, B. Kabius, S. Trasobares, D. J. Miller, S. D. Bader, D. R. Lee, **D. Haskel**, G. Srager, J. P. Liu *J. Appl. Phys. Lett.* **85**, 1 (2004).
130. *Four unit-cell superstructure in the optimally doped YBCO spureconductor* Z. Islam, X. Liu, S. Sinha, J. Lang, S. Moss, **D. Haskel**, G. Srager, P. Wochner, D. Lee, D. Haeffner, U. Welp *Phys. Rev. Lett.* **93**, 157008 (2004).
131. *Temperature evolution of the Gd magnetization profile in strongly coupled Gd/Fe multilayers* Y. Choi, **D. Haskel**, R. Camley, D.R. Lee, J. Lang, G. Srager, J. Jiang, S. Bader *Phys. Rev. B* **70**, 134420 (2004).
132. *Beyond element-specific magnetism: Resolving inequivalent Nd crystal sites in Nd₂Fe₁₄B* **D. Haskel***, J. Lang, Z. Islam, G. Srager, J. Cross, P. Canfield *IEEE Transactions on Magnetics* **40**, 2874 (2004).
133. *Local structural order in the disordered Vanadium tetracyanoethylene room-temperature molecule-based magnet* **D. Haskel***, Z. Islam, J. Lang, C. Kmety, G. Srager, K. Pokhodnya, A. Epstein, J. Miller *Phys. Rev. B* **70**, 054422 (2004).
134. *Analysis and simulation of the structure of nanoparticles that undergo a surface-driven structural phase transition* B. Gilbert, H. Zhang, F. Hunag, J. Banfield, Y. Ren, **D. Haskel**, J. Lang, G. Srager, G. Waychunas *J. of Chem. Phys.* **120**, 11785 (2004).
135. *Measurement of local magnetization in the buried layer of a pseudo-spin-valve submicron wire* Y. Choi, **D. Haskel**, D.R. Lee, J. C. Lang, G. Srager, J. S. Im *J. Appl. Physics* **95**, 7028 (2004).
136. *Imaging spiral magnetic domains in Ho metal using circularly polarized Bragg diffraction* J.C. Lang, D.R. Lee, **D. Haskel** and G. Srager *J. Appl. Physics* **95**, 6537 (2004).
137. *Measurement of x-ray resonant magnetic scattering from induced Cu polarizations in exchanged-coupled Co/Cu multilayers* Y. Hayasaki, K. Ishiji, H. Hashizume, H. Hosoi, K. Homote, M. Kurabayashi, G. Srager, J. Lang, **D. Haskel** *J. Phys.: Condens. Matter.* **16**, 1915 (2004).
138. *Dynamic Inhomogeneities in the La₂CuO₄-Based Superconductors* Edward A. Stern, **Daniel Haskel**, Sang-Wook Han *Journal of Superconductivity* **17**(1), 97 (2004).

2003

139. *X-ray resonant magnetic scattering from structurally and magnetically rough interfaces in multilayered systems. I. Specular reflectivity* D.R. Lee, S.K. Sinha, **D. Haskel**, Y. Choi, J. C. Lang, S.A. Stepanov, G. Srager *Physical Review B* **68**, 224409 (2003).
140. *Nature of inhomogeneous magnetic state in artificial Fe/Gd ferrimagnetic multilayers* **D. Haskel***, G. Srager, Y. Choi, D.R. Lee, J. C. Lang, J. Meerschaut, J.S. Jiang, S.D. Bader *Physical Review B (Rapid Communications)* **67**, 180406(R) (2003).
141. *Multiple Scattering Calculations of Bonding and X-ray Absorption Spectroscopy of Manganese Oxides* B. Gilbert, B.H. Frazer, A. Belz, P.G. Conrad, K.H. Nealon, **D. Haskel**, J.C. Lang, G. Srager, and G.De Stasio *J. Phys. Chem. A* **107**, 2839-2847 (2003).
142. *XAES study of local disorder in the a-Gd(x)Si(1-x) amorphous magnetic semiconductor* **D. Haskel***, J.W. Freeland, J. Cross, R. Winarski, M. Newville, F. Hellman *Physical Review B* **67**, 115207 (2003).
143. *Hard x-ray magnetic circular dichroism study of a surface-driven twisted state in Gd/Fe multilayers* **D. Haskel***, Y. Choi, D.R. Lee, J. C. Lang, G. Srager, J.S. Jiang, S.D. Bader *Journal of Applied Physics* **93**, 6507 (2003).

2002

144. *Magnetization reversal measurements in ferromagnetic antidot arrays by vector magnetometry with x-ray magnetic circular dichroism* D.R. Lee, Y. Choi, C-Y. You, J. Lang, **D. Haskel**, V. Metlushko, S. Bader and G. Srager *J. Appl. Phys. Lett.* **81**, 4997 (2002).
145. *X-ray absorption spectroscopy of the cubic and hexagonal polytypes of zinc sulfide* B. Gilbert, B.H. Frazer, H. Zhang, F. Huang, F.H. Banfield, **D. Haskel**, J. Lang, S. Srager, G. De Stasio *Phys. Rev. B* **66**, 245205 (2002).
146. *X-ray diffraction study of lattice modulations in an underdoped YBa₂Cu₃O_{6+x} superconductor* Z. Islam, S. Sinha, **D. Haskel**, J. Lang, G. Srager, B. Veal, D. Haeffner, H. Mook *Phys. Rev. B* **66**, 092501 (2002).

147. Local Structure in the Stripe phase of $La(1.6-x)Sr(x)Nd(0.4)CuO(4)$ S. H. Han, E. A. Stern, **D. Haskel**, A. R. Moodenbaugh *Phys. Rev. B* **66**, 094101 (2002).
148. Nanostructure in the La_2CuO_4 based superconductors, E.A. Stern and **D. Haskel**, Conference on Superconducting and Related Oxides, SPIE Vol 4811, pp 86-101 (2002).

2001

149. Enhanced Interfacial Magnetic Coupling of Gd/Fe Multilayers **D. Haskel***, G. Srager, J. Lang, J. Pollmann, C. Nelson, J. Jiang, S. Bader *Phys. Rev. Lett.* **87**, 207201 (2001).
150. The use of resonant x-ray magnetic scattering to examine the magnetic phases in UAS-USe solid solutions M.J.Longfield, J.Wilmhurst, L.Bouchenoire, M.J.Cooper, D. Mannix, G.H.Lander, N.Bernhoeft, A.Stunault,W.G.Stirling, J.Pollmann, **D. Haskel**, G.Srager *Journal of Magnetism and Magnetic Materials* **233**, 53 (2001).
151. Ni-induced local distortions in $La(1.85)Sr(0.15)Cu(1-y)Ni(y)O(4)$ and their relevance to T_c suppression: An angle-resolved XAFS study **D. Haskel***, E.A. Stern, V. Polinger and F. Dogan *Phys. Rev. B* **64**, 104510 (2001).
152. Magnetic Imaging of a buried SmCo layer in a spring magnet *J. Pollmann, G. Srager, D. Haskel*, J.C. Lang, J. Maser, J. S. Jiang and S. D. Bader *Journal of Applied Physics* **89**, 7165 (2001).
153. Dopant structural distortions in high T_c superconductors: an active or passive role? **D. Haskel***, E.A. Stern, F. Dogan and A.R. Moodenbaugh *Journal of Synchrotron Radiation* **8**, 186-190 (2001).
154. Suppression of superconductivity in $La1.85Sr0.15Cu1-yNi_yO_4$: The relevance of local lattice distortions **D. Haskel***, E.A. Stern, V. Polinger and F. Dogan in *Physics of Local Lattice Distortions (LLD2K)*, AIP Conference Proceeding **554**, 154 (2001).
155. Role of Sr dopants in the inhomogeneous ground state of $La_2-xSr_xCuO_4$ **D. Haskel***, E.A. Stern and F. Dogan in *Phase transitions and self-organization in electronic and molecular networks* (J. C. Phillips and M. F. Thorpe, Editors), Kluwer Academic/Plenum Publishers, pp. 323-330 (2001).
156. Imaging buried magnetic domains using hard x-rays *J. C. Lang, J. Pollmann, D. Haskel, G. Srager, J. Maser, J.S. Jiang, S.D. Bader* *Proceedings of SPIE* **4499**, 1 (2001).
157. Wide-field x-ray microscopy with Kirkpatrick-Baez optics *T. Jach, S. Durbin, A. Bakulin, D. Bright, C. Stagarescu, G. Srager, D. Haskel and J. Pedulla* *Proceedings of SPIE* **4499**, 38 (2001).
158. Dopant induced enhancement of the Jahn-Teller effect in perovskite cuprates V. Polinger, **D. Haskel** and EA Stern VIBRONIC INTERACTIONS: JAHN-TELLER EFFECT IN CRYSTALS AND MOLECULES BOOK Series: NATO SCIENCE SERIES, SERIES II: MATHEMATICS, PHYSICS AND CHEMISTRY Volume: 39 Pages: 215-219; SPIE volume 4499, p. 38 (2001).

\leq 2000

159. Nanoscopic fluctuational dynamic model of anomalous temperature and concentration dependences in the Sn Mossbauer isomer shift in Ag-Sn alloys Y. Khait, I. Snapiro, H. Shechter and **D. Haskel** *J. Phys.: Condens. Matter* **12**, 7275-7285 (2000).
160. XAFS study of the low-temperature tetragonal phase of $La(2-x)Ba(x)CuO(4)$: Disorder, stripes and T_c suppression at $x=0.125$ **D. Haskel***, E. A. Stern, F. Dogan and A. Moodenbaugh *Phys. Rev. B* **61**, 7055 (2000).
161. Where do the doped holes go in $La(2-x)Sr(x)CuO(4)$? A close look by XAFS **D. Haskel***, V. Polinger and E. A. Stern in *High Temperature Superconductivity, AIP Conference Proceedings* **483**, 241 (1999).
162. Towards nanoscale EXELFS analysis: limitation due to radiation damage **D. Haskel***, M. Sarikaya, M. Qian and E. A. Stern *Micron* **30**, 185-194 (1999).
163. Structural disorder and the origin of high T_c suppression in $La(1.875)Ba(0.125)CuO(4)$ **D. Haskel***, E. A. Stern, F. Dogan and A. Moodenbaugh *Journal of Synchrotron Radiation* **6**, 755 (1999).

164. *Electronic states of doped holes in La(2-x)Sr(x)CuO(4): a unique application of XAFS* □ E. A. Stern, V. Polinger and **D. Haskel** □ *Journal of Synchrotron Radiation* **6**, 373 (1999).
165. *What does Ni do to destroy high Tc superconductivity in LaSrCuNiO?* **D. Haskel***, E. A. Stern, V. Polinger and F. Dogan □ *Journal of Synchrotron Radiation* **6**, 758 (1999).
166. *Comment on "Tilting of the CuO₆ octahedra in LaEuSrCuO as seen by ¹⁵¹Eu Mossbauer spectroscopy* **D. Haskel***, E. A. Stern and H. Shechter □ *Phys. Rev. B* **57**, 8034 (1998).
167. *XAFS study of the B1-to-B2 phase transition in RbCl* □ S. Kelly, R. Ingalls, F. Wang, B. Ravel and **D. Haskel** □ *Phys. Rev. B* **57**, 7543 (1998).
168. *Anomalous concentration dependence of the ¹¹⁹Sn Mossbauer isomer shift of Ag-Sn alloys* H. Shechter, **D. Haskel***, E. A. Stern and Y. Yacoby □ *J. Phys.: Condens. Matter* **10**, 8573 (1998).
169. *Local structural changes in KNbO₃ under pressure* □ A. Frenkel, F. Wang, S. Kelly, R. Ingalls, **D. Haskel**, E.A. Stern and Y. Yacoby □ *Phys. Rev. B* **56**, 10869 (1997).
170. *Altered Sr atomic environment in La_{2-x}Sr_xCuO_{4}* □ **D. Haskel*** and E. A. Stern □ *J. Phys IV FRANCE* **7**, C2-1177 (1997). □
171. *Altered Sr environment in LaSrCuO* **D. Haskel***, E. A. Stern, D. G. Hinks, A. W. Mitchell and J. Jorgensen □ *Phys. Rev. B (Rapid Communications)* **56**, R521 (1997).
172. *Development of the EXELFS technique for nano-scale atomic structure determination* □ **D. Haskel***, M. Qian, E. A. Stern and M. Sarikaya □ *J. Phys IV FRANCE* **7**, C2-557 (1997).
173. *Dopant and temperature induced phase transitions in LaSrCuO* □ **D. Haskel***, E. A. Stern, D. G. Hinks, A. W. Mitchell, J. Jorgensen and J. Budnick □ *Phys. Rev. Lett.* **76**, 439 (1996).
174. *Radiation Damage and Spatial Resolution in the EXELFS of Inorganic Materials* (Postscript, 55K) □ **D. Haskel***, M. Sarikaya, M. Qian and E. A. Stern □ *Microscopy and Microanalysis '96*, p. 558 (1996).
175. *Are Nanophase Grain Boundaries Anomalous?* □ E. A. Stern, R. W. Siegel, M. Newville, P. G. Sanders and **D. Haskel** □ *Phys. Rev. Lett.* **75**, 3874 (1995). □ □
176. *EXELFS as a tool for quantifying phase distributions in materials* **D. Haskel***, M. Sarikaya, M. Qian and E. A. Stern □ *Ultramicroscopy*, **58** n.3-4 p.353 (1995).
177. *Single and multiple scattering XAFS in BaZrO₃: a comparison between theory and experiment* **D. Haskel***, B. Ravel, M. Newville and E. A. Stern □ *Physica B* **208&209**, 151 (1995).
178. *Analysis of multiple-scattering XAFS data using theoretical standards* □ M. Newville, B. Ravel, **D. Haskel**, J. J. Rehr, E. A. Stern and Y. Yacoby □ *Physica B* **208&209**, 154 (1995). □ □
179. *The UWXAFS analysis package: philosophy and details* □ E. A. Stern, M. Newville, B. Ravel, Y. Yacoby and **D. Haskel** □ *Physica B* **208&209**, 117 (1995). □ □
180. *Anomalous temperature behavior of Sn impurities* **D. Haskel**, H. Shechter, E. A. Stern, M. Newville and Y. Yacoby □ *Phys. Rev. B* **47**, 14032 (1993).
181. *Anomalous temperatue behavior of impurities in Lead and Silver Hosts* □ M. Newville, E. A. Stern, **D. Haskel**, H. Shechter and Y. Yacoby □ *Jpn. J. Appl. Phys.* **32**, 628 (1993).

LIST OF ORAL PRESENTATIONS

1. (Invited) Magnetic scattering and spectroscopy at high pressures at APS and APS-U, EBS Workshop “X-ray spectroscopy of Magnetic Materials”, ESRF, Grenoble France (October 7-9, 2019).
2. (Invited) *Magnetic scattering and spectroscopy at high pressures at APS and APS-U*, PRESSYNC Workshop “Synchrotron Techniques Under High Pressure”, CNPEM, Campinas, Brazil (July 31-August 2, 2019).
3. (Contributed) *APS-U POLAR beamline*, Experimental Scientific Advisory Committee Review of APS-U beamlines, Argonne IL (May 20, 2019).
4. (Contributed) *XAS Branching ratios and glitch-free XAFS with nano-polycrystalline diamond anvils: quantum spin liquids versus dimerized phases in honeycomb iridates*, Spectroscopy Special Interest Group, Argonne IL (February 2, 2019).
5. (Contributed) *Magnetic scattering and spectroscopy at high pressures at APS and APS-U*, Scientific Advisory Committee meeting, Argonne IL (November 8, 2018)
6. (Contributed) *APS-U POLAR Beamline*, DOE CD-2 Review of the APS-U Project, Argonne IL (October 10-12, 2018)

7. (Contributed) *Opportunities for polarization-dependent spectroscopy and scattering at APS-U*, Workshop “Discovery, synthesis and development of emergent materials and the role of APS-U”, Argonne IL (September 27-28, 2018).
8. (Invited Talk) *X-ray resonant probes of magnetism at high pressures: towards realization of novel quantum spin liquids in 5d oxides*, Condensed Matter Physics Seminar, U. Colorado Boulder (September 6, 2018)
9. (Contributed) *APS-U POLAR beamline*, Director review, CD-2 APS-U project, Argonne IL (August 22, 2018).
10. (Contributed) *POLAR: Polarization Modulation Spectroscopy*, APS-U technical review, Argonne IL (August 15, 2018).
11. (Contributed) *Edward A. Stern Memorial Plenary Session*, The 17th International XAFS Conference, Krakow, Poland (July 27, 2018)
12. (Invited Talk) *X-ray resonant probes of magnetism at high pressures: towards realization of novel quantum spin liquids in 5d oxides*, The 17th International XAFS Conference, Krakow, Poland (July 22-27, 2018)
13. (Invited Talk) *Opportunities in polarization-dependent spectroscopy at APS-U*, The 17th International XAFS Conference, Workshop "Advances in XAFS Experimental Techniques: Bridging the Light Source Generations", Krakow, Poland (July 21, 2018)
14. (Invited Talk) *Manipulating exchange interactions and search for quantum spin liquids*, Gordon Research Conference "Research at High Pressures", Holderness, NH (July 15-20, 2018)
15. (Contributed) *Opportunities for x-ray polarization control at APS-U*, APS-U Forum, Advanced Photon Source, Argonne (April 12, 2018)
16. (Invited Talk) *Probing Magnetism at High Pressure with Polarized X-rays: Beyond Ferromagnets*, HPCAT Workshop on Probing Materials under Extreme Conditions using Synchrotron Radiation, Argonne, IL (October 30-31, 2017)
17. (Contributed) *Magnetic scattering and spectroscopy*, Mini Workshop "Helical Superconducting Undulator at 7ID: Planning first experiments", Argonne, IL (September 18, 2017)
18. (Invited Talk) *Probing magnetism at high pressure with polarized x-ray resonant absorption and scattering techniques: Novel quantum magnetism in 5d oxides driven by strong spin-orbit interactions*, The 26th International Conference on High Pressure Science and Technology (AIRAPT 26), Beijing, China (August 18-24, 2017)
19. (Contributed) *POLAR: Polarization Modulation Spectroscopy*, Experimental Scientific Advisory Committee Review of APS Upgrade beamlines, Argonne, IL (July 19-21, 2017)
20. (Invited Talk) *Adventures with 5d orbitals at high pressure*, MRS Spring Meeting Symposium "Emergent Materials Properties and Phase Transitions under Pressure", Phoenix, Arizona (April 18-20, 2017)
21. (Invited Talk) *Adventures with 5d orbitals at high pressure*, Seminar, High Pressure Science and Engineering Center, Physics Department, University of Nevada Las Vegas (January 18, 2017)
22. (Invited) *Adventures with 5d orbitals at high pressure*, XV Brazil MRS Meeting, Symposium “Materials Science at High Pressure Conditions”, Campinas, Brazil (September 2016)
23. (Invited) *Polarization modulation spectroscopy: Electronic Matter under extreme conditions*, Workshop “ Overview of APS upgrade beamline proposals”, APS/CNM Users Meeting, Argonne IL, USA (May 2016)
24. (Contributed) *Frustration in square lattice of Iridium Jeff=1/2 moments at high pressure*, March Meeting of the American Physical Society, Baltimore, USA (March 2016).
25. (Invited) *Magnetism at high pressure probed with x-ray resonant absorption and scattering techniques*, Condensed Matter Physics Seminar, University of Missouri, Columbia Mo (September 16, 2015).
26. (Invited) *Magnetism at high pressure probed with x-ray resonant absorption and scattering techniques*, Joint AIRAPT-25 and EHPRG-53, Madrid, Spain (August 2015).
27. (Invited) *X-rays and Magnetism- Part I and Part II (2 lectures)*, SyncLight 2015, Sao Paulo School of Advanced Sciences on recent developments in Synchrotron radiation, Campinas, Sao Paulo, Brazil (July 2015)

28. (Invited) *Frustration in AFM square lattice of Jeff=1/2 moments at high pressure*, Competing interactions and colossal responses in transition metal oxides, Telluride, Colorado (June 8-12, 2015).
29. (Invited) *Frustration in AFM square lattice of Jeff=1/2 moments at high pressure*, Enhanced Functionalities in 4d and 5d transition metal compounds from large spin-orbit coupling, Telluride, Colorado (June 14-18, 2015).
30. (Invited) *Possible quantum spin liquid state in square lattice of Jeff=1/2 moments at high pressure*, Spin orbit coupling and magnetism in correlated transition metal oxides workshop, Ohio State University (May 4-7, 2015).
31. (Invited) *XAFS and other techniques*. XAFS14: a short course on methods and applications of XAFS (Nov 13-15, 2014).
32. (Invited) *X-ray spectroscopy and high pressure tuning of the S-O coupled ground state of Iridate (5d) oxides*, Condensed Matter Physics Seminar, University of Notre Dame (October 9, 2014).
33. (Invited) *Recent progress in high pressure studies of magnetism using polarized x-ray techniques*, 2014 Annual Users Meeting, Argonne National Laboratory (May 14, 2014)
34. (Invited) *Magnetism at High Pressures*, Colloquium, Materials Science Division, Argonne National Laboratory (May 8, 2014)
35. (Invited) *High pressure studies of magnetism using polarized x-ray techniques: Present and Future*, Workshop Extreme Conditions Experiments for today and at Sirius, LNLS/CNPEM, March 13-14, 2014 (Campinas, Brazil)
36. (Invited) *X-ray spectroscopy and high-pressure tuning of the spin-orbit coupled ground state of Iridate oxides*, Condensed Matter Seminar, Department of Physics, Ohio State University, October 10, 2013 (Ohio, USA)
37. (Invited) *Tuning the Spin-orbit coupled ground state of Sr₂IrO₄ with Pressure*, Workshop on Opportunities to study magnetism and related phenomena in 4d and 5d systems, July 22-24, 2013 (ORNL, TN, USA)
38. (Invited) *Instrumentation for high pressure studies of magnetism using polarized x-ray techniques*, "High Pressure" satellite workshop to Synchrotron radiation instrumentation (SRI2013), June 17, 2013 (Gaithersburg, MD USA)
39. (Invited) *X-ray spectroscopy and high-pressure tuning of the S-O coupled ground state of iridate (5d) oxides*, Condensed matter and biological Physics Seminar, Washington University in St. Louis, April 29, 2013 (St. Louis, USA)
40. (Invited) *Tuning the spin-orbit coupled ground state of Iridates with pressure*, March meeting American Physical Society, March 18-22, 2013 (Baltimore, USA)
41. (Contributed) *Pressure tuning of the spin-orbit coupled ground state of Sr₂IrO₄*, 12th Joint MMM-Intermag Conference, Jan 14-18, 2013 (Chicago, USA)
42. (Contributed) *DOE CD-2 Review of the APS Upgrade*, APS, ANL (December 5, 2012)
43. (Invited) *X-ray absorption spectroscopy at high pressures*, Diamond Light Source, Oxfordshire, United Kingdom (October 12, 2012).
44. (Invited) *Electronic ground state properties of Iridate oxides from x-ray absorption spectroscopy*, Kentucky Condensed Matter Physics Symposium: The Iridates, Lexington KY (April 28-29, 2012).
45. (Contributed) *Electronic ground state properties of Iridate oxides from x-ray absorption spectroscopy*, March Meeting American Physical Society, Boston MA (Feb 27-29, 2012).
46. (Invited) *Magnetism at High Pressures* DOE/BES Triennial review of the Advanced Photon Source, Argonne IL (September 12-15, 2011)
47. (Invited) *Magnetism at High Pressures*, University of Chicago review of APS Science (July 27-29, 2011)
48. (Invited) *Probing Spin-Orbit interactions in BaIrO₃ with x-ray absorption spectroscopy* Workshop on Physics driven by Spin-orbit coupling in TM compounds, IOP, CAS Beijing, China (June20-June22 2011)
49. (Invited) *Charge-Magnetic Interference hard x-ray resonant scattering studies of ferromagnetic crystals and thin films* Resonant Elastic X-ray Scattering (REXS 2011) conference, Aussois, France (June13-June18 2011)

50. (Invited) *Interplay between structure and magnetism in Gd₅(SixGe_{1-x})₄ alloys* Symposium on Magnetic Materials for Energy applications, TMS Annual Meeting, San Diego, CA (February 27-March 3 2011)
51. (Contributed) *Magnetism at High Pressures* 1st North American Core Shell Spectroscopy Conference (NACSSC), Denver Colorado (August 2010)
52. (Invited) Probing Magnetism with X-rays: New tools, New insights, Condensed Matter Physics Seminar, Washington University St. Louis (April 2010).
53. (Contributed) *Coexistence of weak ferromagnetism and superconductivity in Ru-1222* March Meeting of the American Physical Society, Portland Oregon (March 2010)
54. (Contributed) *Coexistence of weak-ferromagnetism and superconductivity in RuSr₂Eu_{1.5}Ce_{0.5}Cu₂O₁₀*, 11th Joint MMM-Intermag conference, Washington DC (January 2010)
55. (Invited talk) *Complex oxide magnetism at high pressures* 2009 Villa Conference on Complex Oxide Heterostructures (VC-COH), St. Thomas, USVI (September 2009)
56. (Invited talk) *X-ray vision of the inner-workings of functional magnetic materials* Magnetics Conference 2009, Chicago, Illinois USA (April 2009)
57. (Invited talk) *Squeezing Magnets- and what can we learn from it* Physics Colloquium, Northern Illinois University, Illinois, USA (April 2009)
58. (Invited talk) *Squeezing Magnets- and what can we learn from it* Seminar, Department of Materials Physics, Universidad Complutense de Madrid, Madrid, Spain (March 2009)
59. (Invited talk) *Magnetism at High Pressures* Energy Dispersive X-ray Absorption Spectroscopy: Scientific Opportunities and Technical Challenges, ESRF, Grenoble, France (February 2009)
60. (Invited talk) *High-pressure XMCD at the Advanced Photon Source* Workshop in Advances in X-ray absorption spectroscopy under high pressures, 46th EHPRG- European High Pressure Research Group conference, Valencia, Spain (September 2008)
61. (Invited talk) *XAFS and other techniques* XAFS Summer School, Argonne National Laboratory, Argonne IL (August 2008)
62. (Invited) *Site-specific Magnetic Spectroscopy of Functional Materials*, SRMS-6: 6th International Conference on Synchrotron Radiation in Materials Science, Campinas, Brazil (July 2008).
63. (Invited) *High pressure studies of Magnetism using XMCD: the case of giant magnetocaloric material GdSiGe*, 2nd Workshop on Novel Electronic Materials, Lexington Kentucky, USA (May 2008).
64. (Invited) *High pressure studies of magnetism at the Advanced Photon Source*, “In Situ Experiments Under Extreme Conditions Utilizing Synchrotron Radiation”, 18th LNLS annual users meeting (RAU) Campinas, Brazil, (February 2008).
65. (Invited) *Magnetic Spectroscopy at High Pressures using XMCD*, International Workshop on Synchrotron High Pressure Mineral Physics and Materials Science, Argonne National Laboratory (December 2007).
66. (Invited) *Magnetic Spectroscopy of Functional Materials*, University of Chicago Review of APS Science, Argonne National Laboratory (September 2007).
67. (Invited) *Magnetic Spectroscopy of Functional Materials*, Scientific Advisory Committee Review of XOR Science, Argonne National Laboratory (September 2007).
68. (Invited) *The role of Ge in mediating FM interactions in Gd₅SixGe_{1-x} alloys*, Condensed Matter Physics Seminar, Physics Department, Instituto de Ciencia de Materiales de Aragon University of Zaragoza, Zaragoza Spain (March 2007).
69. (Invited) *X-ray studies of the role of Ge in mediating Ferromagnetism in Gd₅Si₂Ge₂*, Physics Seminar, Instituto de Magnetismo Aplicado, Universidad Complutense de Madrid. Madrid Spain (February 2007).
70. (Contributed) *Role of Ge in bridging ferromagnetism in giant magnetocaloric Gd₅(Ge_{1-x}Six)₄*, 10th Joint MMM/Intermag conference, Baltimore, MD, USA (January 2007).
71. (Invited) *New insights into Permanent Magnets*, 53rd Midwest Solid State Conference, Kansas City, USA (October 2006).
72. (Contributed) *Interplay between structure and magnetism in magnetocaloric material GdSiGe*, Fifth International conference on Synchrotron Radiation in Materials Science (SRMS-5), Chicago, USA (August 2006).

73. (Contributed) *Dichroic resonant diffraction of circularly polarized x-rays: a route to element- and site-specific magnetism*, The 13th International XAFS Conference, XAFS XIII, Stanford University, USA (July 2006).
74. (Invited) *Shedding (x-ray) light into the inner-workings of complex magnetic materials*, Condensed Matter Seminar, Physics Department, University of Notre Dame, Indiana, USA (May 2006).
75. (Contributed) *A new setup for HP-XMCD studies of magnetism at sector 4: First results*, High-Pressure special interest group meeting, Advanced Photon Source, Argonne (April 2006).
76. (Contributed) *Insights into Permanent Magnets*, Advanced Photon Source Operations Monthly Meeting, Argonne, Illinois (December 2005)
77. (Invited) *Inhomogeneous Magnetic States in Gd/Fe and SmCo/Fe Nanolayers*, AVS 52nd International Symposium, Magnetic Nanostructures, surfaces and Interfaces, Boston, USA (November 2005).
78. (Invited) *Element- and site-specific study of the atomic origin of magnetic hardness in modern magnets*, Symposium on "Combined XAS and XRD techniques in Physics, Chemistry and Materials Science", XX Congress of the International Union of Crystallography (IUCR), Florence, Italy (August 2005).
79. (Invited) *XAFS and other techniques*, Advanced Photon Source XAFS Summer School 2005, Argonne, IL, USA (July 2005).
80. (Invited) *XMCD studies of inhomogeneous magnetic states*, Nanomagnetism: Materials and Probes; Workshop at NSLS 2005 annual user's meeting, Brookhaven, Upton, NY, USA (May 2005).
81. (Contributed) *X-ray structural and magnetic studies of the magnetic-martensitic transition in Gd₅Si_{0.5}Ge_{3.5}*, March meeting of the American Physical Society, Los Angeles, CA, USA (March 2005).
82. (Invited) *Understanding our best permanent magnets: X-ray studies of element- and site-specific magnetism in Nd₂Fe₁₄B crystals*□□Department of Chemistry, University of the Republic of Uruguay, Montevideo, Uruguay (December 2004)□.□
83. (Invited) *Hard x-ray magnetic studies at the Advanced Photon Source*□□Strategic meeting of users of x-ray absorption spectroscopy at ALBA, Sevilla, Spain (October 2004).
84. (Invited) *Beyond element specific magnetism: Magnetic spectroscopy in the diffraction channel*□□Workshop on Nanomagnetism using X-ray techniques, Lake Geneva, WI (August, 2004).
85. (Invited) *Synchrotron radiation studies of magnetism in layered nanostructures*□□Nanomagnetism Workshop, Center for Nanoscale Materials first users meeting, Argonne, IL (May, 2004).
86. (Invited) *Site-specific magnetism and the spin-reorientation transition in Nd₂Fe₁₄B permanent magnet*□Workshop on interplay of Magnetism and Structure in Functional Materials, Benasque Center for Science, Spain (February, 2004).
87. (Invited) *Element and site-specific magnetism: X-ray studies in the absorption and diffraction channels*□□Physics Colloquium, University of Nebraska, NE (January, 2004).
88. (Contributed) *Element and site-specific magnetism in Nd₂Fe₁₄B single crystal*□□9th Joint MMM/INTERMAG Conference, Anaheim, CA (January, 2004).
89. (Contributed) *Beyond element-specific magnetism in Nd₂Fe₁₄B permanent magnet*□□DOE-CESP Nanocomposite Magnetic Materials Annual Workshop, Asilomar, CA (October, 2003).
90. (Contributed) *Beyond element specific magnetism: Anomalous diffraction using circularly polarized x-rays*□□12th International conference on x-ray absorption fine structure, Malmo, Sweden (June, 2003)□□□
91. (Invited) *X-ray studies of Magnetism: Element Specificity and Beyond*□□BNL/NSLS Symposium Series, Long Island, New York (2003).
92. (Invited) *X-ray studies of Magnetism: Element Specificity and Beyond*□□Physics Colloquium, Yeshiva University, New York (2003).
93. (Contributed) *Hard x-rays MCD studies of magnetic phase transitions- with a twist*□□47th Conference on Magnetism and Magnetic Materials, MMM02, Tampa, FL, USA (2002).

94. (Invited) *Using Circularly Polarized X-rays to study Layered Magnetic Nanostructures* □□ Symposium on Impact of Scattering on Nanoscience and Technology, 2002 ACA Annual Meeting, San Antonio, TX, USA (2002).
95. (Contributed) *Hard x-ray MCD studies of a surface-driven twisted state in artificial Gd/Fe ferrimagnetic multilayers* □□ DOE-CESP Annual Workshop on Nanocomposite Magnetic Materials, Stony Brook, NY, USA (2002).
96. (Contributed) *Local structure of amorphous V[TCNE]_x molecular magnet* □□ March meeting of the Americal Physical Society, Indianapolis, IN, USA (2002).
97. (Invited) *XAFS in Anisotropic Structures: Exploiting angular dependence for better modeling* □□ Workshop on Advanced Methods and Tricks of EXAFS Data Modeling, 2001 NSLS Annual Users' Meeting, NSLS, Brookhaven, USA (2001).
98. (Invited) *Dopant Structural distortions in High Tc superconductors: Active or Passive Role?* □□ The 11th International XAFS conference (XAFS11), Ako, Japan (2000).
99. (Contributed) *Charge Inhomogeneities, Tc suppression and M-I transition in Ni-doped La(2-x)Sr(x)Cu(1-y)Ni(y)O(4)* □□ International Symposium on Physics in Lattice Distortions (LLD2K), Tsukuba, Japan (2000) □.
100. (Invited) *Role of Sr dopants in the inhomogeneous ground state of La(2-x)Sr(x)CuO(4)* □□ Phase transitions and self organization in electronic and molecular networks, Cambridge University, Cambridge U.K. (2000).
101. (Contributed) *Where do the doped holes go in LaSrCuO? A close look by XAFS* □□ High Temperature Superconductivity (HTS99), Coral Gables, Florida USA (1999).
102. (Contributed) *Structural disorder and the origin of high Tc suppression in LaBaCuO* □□ X International XAFS conference, Chicago USA (1998).
103. (Contributed) *Towards atomic resolution EXELFS?* □ M.Qian, D.Haskel, E.A.Stern, M.Sarikaya □ Towards Atomic resolution analaysis (TARA98), Port Ludlow, Washington USA (1998).
104. (Contributed) *Disorder LTT ground state in LaBaCuO* □□ March Meeting of the American Physical Society, Los Angeles, CA USA (1998) □.
105. (Contributed) *Altered Sr environment in LaSrCuO* □□ Gordon Research conference on High Tc superconductivity, Ventura, CA USA (1997) □.
106. (Contributed) *Development of EXELFS for nanoscale atomic structure determination* □□ IX International XAFS conference, Grenoble, France (1996).
107. (Contributed) *Ultimate spatial resolution in the EXELFS of inorganic materials* □ D.Haskel, M.Qian, M.Sarikaya, E.A.Stern □ Microscopy Society of America (MSA) Annual meeting, Minneapolis, MN USA (1996).
108. (Contributed) *XAFS studies of phase transitions in LaSrCuO* □□ March meeting of the American Physical Society, San Jose, CA USA (1995).
